Drug and alcohol addiction studies have shown that an individual's chance for reaching long-term sobriety is greatly increased by an extended stay in a recovery program. Through the duration of the program, participants develop positive life skills while overcoming self-destructive behaviors. This enables participants to become physically, emotionally and socially balanced so that they regain a full and productive life in society.

In addition to chemical dependency, the program addresses anger management, personal relationships, family dynamics, self-acceptance and relapse prevention.
